

Winterizing Tips to Protect Your Home This Year

- **01.** Identify and fix water leaks throughout the home, including the basement or crawl space.
- **02.** Inspect for cracks and damages to the foundation and repair them immediately.
- **03.** Fill gaps between windows, doors, and exterior walls with caulk.
- **04.** Cover basement windows with plastic film to keep in heat.
- **05.** Insulate pipes with foam insulation.
- **06.** Seal exposed ductwork with aluminum tape.
- **07.** Replace furnace filters to reduce energy use.
- **08.** Update basement or crawl space insulation.
- **09.** Add interior drains and a sump pump to protect against water damage.
